

JARRETT GOSSETT

SOFTWARE ENGINEER

EXPERIENCE

Senior Software Engineer @ [Datadog](#)

Jan 2022 — Present

- At Datadog I work on the Frontend Developer Experience team, working on tools for frontend engineers such as our development environment, a chrome extension to manage deploys, and the frontend CI pipeline.

Staff Engineer @ [Mailchimp](#)

Jan 2017 — Dec 2021

- I worked on a handful of product features including a new UI for editing campaigns and the UI to create postcard based campaigns.
- I helped architect and plan Mailchimp's transition from an MVC, server-driven model to building new features with a client-side React architecture.
- I led the creation of the React component library for Mailchimp, known as Wink.
- I routinely mentored junior engineers through pairing sessions and code reviews.

Lead Software Engineer @ [REscour](#)

Jun 2014 — Jan 2017

- REscour brought me onboard to lead their UI engineering, including the primary REscour application as well as the data management tools.
- I worked directly with the CTO and CEO to plan new features and UX
- I spearheaded efforts to enforce and maintain code quality, continuous deployment, and to convert a legacy Angular.js app to a React/Redux-based architecture.

Software Engineer @ [Tapjoy](#)

Sep 2012 — Jun 2014

- I worked on Tapjoy's Partner Tools team, building features for the customer dashboard.
- During that time, we completely modernized the Tapjoy dashboard and ad management platform.
- Working in the Atlanta office of Tapjoy, headquartered in San Francisco, taught me how to work remotely with a distributed team.
- At Tapjoy, I first started working on client-driven applications using a single page application architecture.

Lead Developer @ [Remark Media](#)

Sep 2009 — Aug 2012

- I played an instrumental role in the development of high traffic websites including Sharecare and Dimespring.
- After being promoted to lead developer, my primary role was managing high-level architecture, prototyping new features, developing libraries/tools and helping other developers troubleshoot tough problems.

Web Developer @ [AirTight Design](#)

Oct 2006 — Sep 2009

- While at AirTight Design, an agency with numerous clients of all sizes, I lead several web application projects from conception to launch for clients such as Berkshire Hathaway, Kia, and Cartoon Network.
